In the claims:

17. A process for the preparation of a polyolefin molding composition comprising at least two polyolefinic components, wherein the composition is characterized by a broad, bimodal or multimodal melting range in the DSC spectrum (heating/cooling rate 20° C/min), wherein the melting point of the lower melting component is lower than any melting point of the composition, the melting range maximum is between 120 and 165°C, the half-intensity width of the melting peak is broader than 10°C and
